

Configuring your computer for DHCP

Windows 2000/XP:

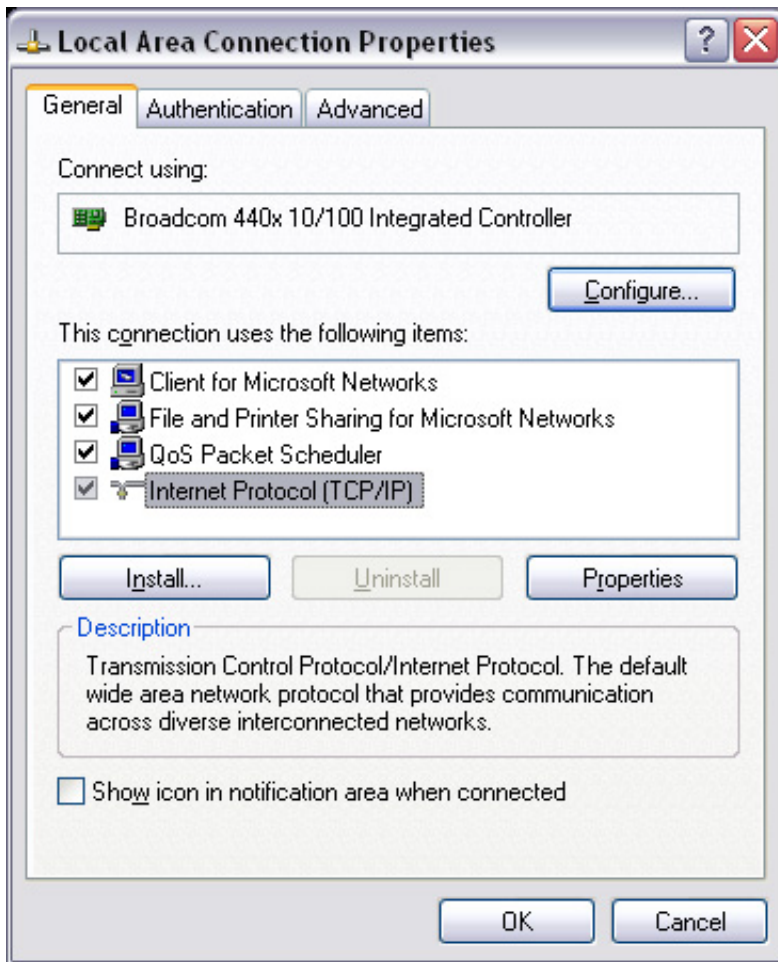

· Right-click on the "My Network Places" icon on your desktop, then click on "Properties".

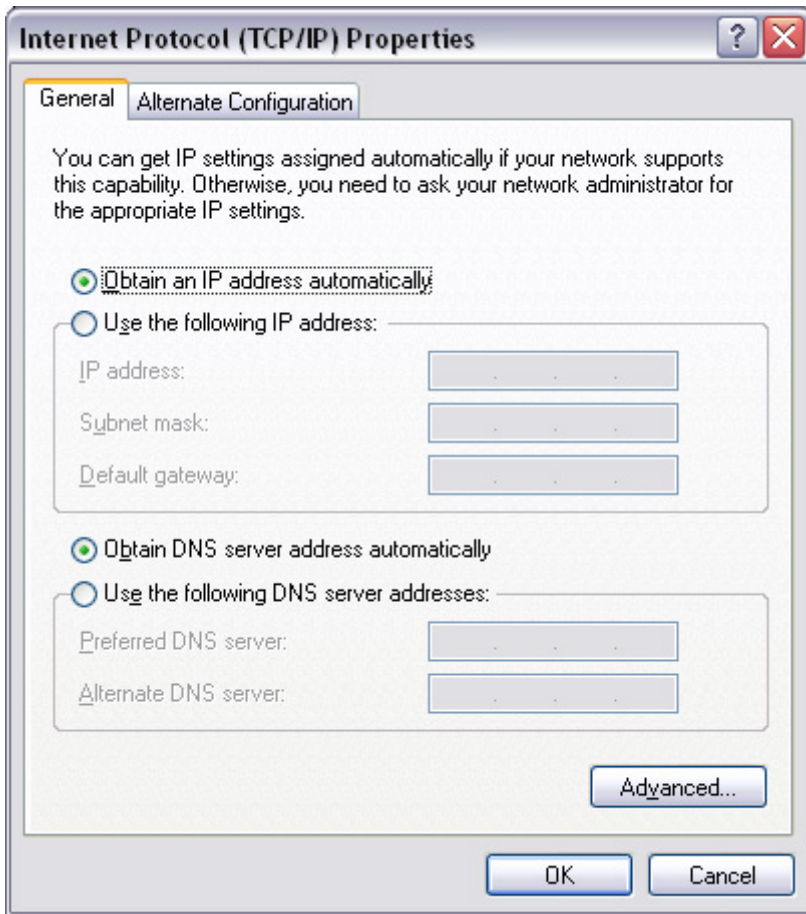

· Right-click the "Local Area Connection" icon, then click "Properties".

· Highlight "Internet Protocol (TCP/IP)" then click the "Properties" button.

. Select "Obtain an IP address automatically" and "Obtain DNS server address automatically".

. Click the "OK" button on the "Internet Protocol (TCP/IP) Properties" window and on the "Local Area Connection Properties" window, then close the "Network Connections" window.
